PROJECTS

Weather Forecast Application | [Link](#) | [Live](#) Dec' 25

Tech Stack: GitHub, React JS, JavaScript, HTML, CSS

- Developed a responsive weather application using React.js that fetches real-time weather data from OpenWeather API.
- Implemented dynamic components to display temperature, humidity, wind speed, and weather conditions based on user's location or city search. Utilized asynchronous JavaScript (fetch API) for efficient API handling and improved performance.
- Achieved a 95% positive user feedback rate for UI responsiveness and accurate weather predictions.

Udyog Sarthi-Web Job Portal | [Link](#)

Nov' 25 – Dec' 25

Tech Stack: GitHub, MERN Stack, Tailwind CSS

- Developed a **full-stack MERN job portal application** enabling job seekers to apply for jobs and administrators to manage job postings, applications, user activity, approvals, and protected workflows.
- Designed a **responsive front-end using React.js**, delivering a smooth user experience across devices with core features including job posting, application tracking, and role-based dashboards.
- Implemented a **secure backend using Node.js, Express.js, MongoDB, and JWT authentication**, ensuring role-based access control and efficient CRUD operations for users, jobs, and applications.

TRAINING

CSE Pathshala(Edtech Company) | [Link](#) Jun' 25 – Jul' 25

Web Development using Next.js, Angular.js

- Gained hands-on experience building dynamic and responsive web applications using **Next.js** and **Angular.js**.
- Integrated **REST APIs** and enhanced UI performance using **React Hooks**, **Angular Services**, and **lazy loading** techniques.
- Collaborated on **team-based projects**, improving version control and deployment workflow using **Git**, **GitHub**, and **Netlify**.
